October 30th

Steinway Pianos

REMAIN UNEXCELLED

From the very beginning of its production, over half a century ago, the STEINWAY gained a lead over other pianos which it has constantly maintained.

Those who have been led to believe that the STEINWAY is resting on laurels won in the past are now urged to make a critical comparison between it and other makes. The result will be a conviction that the STEINWAY is still far ahead of its nearest followers.
