The Dunning System is the only system indorsed by the world's most renowned musicians.

Theodore Leschetizky says: "Carre L. Dunning's system seems to me most practical, and I recommend it for the first musical instruction of children or beginners. It ought to meet with favor and success wherever the beginning of a musical education is contemplated."

"Count the Oysters in Bill's Quart"

That's the way Bill Hartigan, fish dealer, worded his advertisement when he found a competitor selling oysters for 30c a quart when his own price was 60c.

Counting the oysters in one of Bill's quarts proved that there were exactly twice as many as in the other fellow's—the balance of the 30c quart being water.

Perhaps you think it is a far cry from oysters to tires—but compare the number of miles of service in a Hood Extra Ply with any other tire of equal size and you'll see what we are driving at. For example: You can pay about \$34.75 for a 33x4-inch tire of so-called **standard** make and get for your money about 4,000 miles. But for an additional \$10.80 you can buy a Hood which—based on the records of the past year—should run you from 8,000 to 10,000 miles. To give you 8,000 miles, the standard would—at its own cost per mile—actually cost you about \$69.50 as against the Hood price of \$45.55.
