## The Delight of "Perfectness"

To be perfect is the goal of every true man or woman, or at least to be as near perfect as possible in this world of sorrows and sunshine.

The Ukrainian Chorus is pronounced to be the nearest approach to perfection in vocal rendering of music and in a similar way, those who know, not those who have an axe to grind, but those who are impartial, pronounce the wonderful, almost human, service rendered them by the Gasco Furnace with its faithful little Thermostat, that keeps the heat of your house just where you desire it, as the nearest to perfect perfection.

Musical critics have in vain looked for words adequate to describe the singing of the Ukrainian Chorus. Likewise thousands of Portlanders have exhausted their vocabulary to express their delight with the Gasco. There is only one Gasco.
